Environmental Footprint

Reducing the school's environmental footprint

The school is conscious of the environment and is decreasing the reliance on hard copies of documents in the workplace. The school's photocopying budget is minimized to support this as too is the introduction to Ipads in the classroom. In order to save electricity, lights and air-conditioning is only switched on when a classroom is in use and turned off when teachers/students exit the classroom.

ENVIRONMENTAL FOOTPRINT INDICATORS		
Years	Electricity kWh	Water kL
2013-2014	362,593	1,828
2014-2015	371,126	
2015-2016	365,891	958

The consumption data is compiled from sources including ERM, Ergon reports and utilities data entered into OneSchool by each school. The data provides an indication of the consumption trend in each of the utility categories which impact on the school's environmental footprint.

Early leavers information

The destinations of young people who left the school in Years 10, 11 and prior to completing Year 12 are described below.

Wellington Point State High School is committed to ensuring that every student who leaves our gates is on a pathway to earning or learning. Any student who indicates a desire to leave early is counselled. In most instances the student is redirected and supported onto a successful completion of their studies within the school environment. If this is not in the best interest of the student, we ensure their pathway is clear and that the student and their parent/carer have the necessary information and connection to make an earlier exit a success. In many instances, the school's Senior Guidance Officer will make contact to ensure a successful outcome.
